VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-sale veterinary examination of **Lot 442, FASTNET ROCK ex TEMPLE OF PEACE (JPN) bay yearling colt**, brands as described in the 2017 NZ Bloodstock Premier Yearling Sales Catalogue, was carried out at the NZ Bloodstock Karaka Sale Complex, on 30th January 2017, prior to the commencement of the NZ Bloodstock sale.

Clinical Examination:

He was a well grown individual with good bone. An attractive moving horse with excellent depth of girth and length of rein. He was presented in good health however was noted to be carrying unnecessary extra condition. I advised Dynamic Syndications if they were to purchase the colt, he needed to be placed on a controlled diet for a minimum of 3 months to ensure he doesn't become too heavy. He is a quality yearling standing over good ground. The colt is still immature and is a horse that would benefit with additional time before being introduced into training. All clinical parameters were found to be within normal limits. He was examined in hand, and was found to be free moving. Stethoscope examination of heartbeat was normal. There was no clinical evidence of wear or injury to her extremities.

Radiographic Examination:

Pre-sale there was a full set of radiographs available for inspection in the repository at the NZ Bloodstock Complex. Upon examination, they were of low risk as there were no radiographic findings of any significance noted.

Endoscopic Examination:

Post sale the upper respiratory tract was examined endoscopically and the larynx and pharynx were found to be normal in appearance and function.

Conclusion:

In my opinion, at the time of this examination, **Lot 442, FASTNET ROCK ex TEMPLE OF PEACE (JPN) bay yearling colt**, is in so far as can be determined from the extensive examination conducted, suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover. I confirm that I advised Dynamic Syndications that in my opinion this lot was suitable for purchase.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
2 February 2017

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective yearling purchases at all yearling sales within Australasia.

VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications our practice was asked to re-examine the **FASTNET ROCK ex TEMPLE OF PEACE Bay 2yo Colt** brands as described in the 2017 NZ Bloodstock Premier Yearling Sales Catalogue, Lot 442 Capital C nr sh., 35 over 5 off sh., to assess its continued suitability for public syndication. The purpose of the re-examination request was for the promoter to meet ongoing compliance with regulatory requirements and supply a current veterinary certificate for inclusion with their PDS to Racing NSW.

I had previously inspected this horse on behalf of Dynamic Syndications at the NZ Bloodstock Premier Yearling Sale on the 30th January 2017 where a detailed inspection including a full set of x-rays were read and post sale endoscopic evaluation was performed and I advised our client the colt was in my opinion suitable for purchase.

Clinical Examination:

The re-examination performed was a general health check which included temperature, pulse, respiration, thoracic auscultation as well as an ophthalmological examination for eye sight, mucous membrane, colour and musculature symmetry and basic conformation, where no abnormalities were found.

There was no lameness at the walk and trot in hand. No response to hoof testers was found. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The colt had a quiet temperament

The colt remains a quality individual, athletic and free moving. He is well conformed and well balanced. The colt is still immature and will develop further. All clinical parameters were found to be within normal limits.

No radiographs, blood tests, drug sampling, ECG or upper respiratory endoscope were performed.

Conclusion:

In our opinion on the **15th August 2017** at the time of this re-examination, the **FASTNET ROCK ex TEMPLE OF PEACE Bay Colt** is in so far as can be determined from the examination conducted, presents in good health and has passed the clinical examination and therefore remains suitable for all risk mortality insurance cover and is suitable for racing and public syndication.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
