VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-sale veterinary examination of **Lot 270, RECONDITE (GB) - A Southern Hemisphere 4YO Bay Gelding (3YO Northern Hemisphere) by ACCLAMATION (GB) ex AQUARIAS STAR (IRE)**, as described in the **2019 TATTERSALLS UK Autumn Horses-In-Training Sale Catalogue**, was carried out at the Tattersalls Sales Complex, **NEWMARKET, SUFFOLK, UK**, on the **27th October 2019**, prior to the commencement of the next day's sale.

Clinical Examination: **PASS – Score 8**

He was a very well conformed gelding. Athletic, scopey, staying type covering good ground. He has an excellent length of rein, deep girth, strong shoulder, good hip to hock length and a good straight hind leg conformation. Standing approximately 16.1hh, he was presented in excellent condition. The gelding has been in training and racing well. All clinical parameters were found to be within normal limits. He was examined in hand, and was found to be free moving. Flexion tests were within normal limits. Stethoscope examination of heartbeat was normal. There was no clinical evidence of wear or injury to his extremities. Full disclosure of this horse's veterinary history by Juddmonte Farm was available for inspection. Having read the file there were no historical issues of any significance noted.

A blood test was undertaken post sale to determine for the presence of any steroids or drugs in the system. None were detected.

A secondary blood test for the Piroplasmosis Virus was undertaken post sale to determine if the horse was a carrier – no abnormality was detected.

Radiographic Examination:

X-Ray inspection was unable to be undertaken because conditions of sale do not require the vendor of any lot to submit X-Rays.

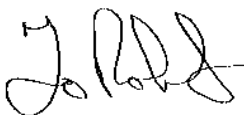

Endoscopic Examination:

Pre-sale the upper respiratory tract was examined endoscopically and the larynx and pharynx were found to be normal in appearance and function. Post sale a further wind-test was conducted by Rossdale & Partners Veterinary Practice and there were no findings of any significance noted. **PASS - Grade 3 A**

Conclusion:

In my opinion, at the time of this examination, **Lot 270, RECONDITE (GB) - A Southern Hemisphere 4YO Bay Gelding (3YO Northern Hemisphere) by ACCLAMATION (GB) ex AQUARIAS STAR (IRE)**, is in so far as can be determined from the examination conducted, suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover. I confirm that I advised Dynamic Syndications that in my opinion this lot was suitable for purchase.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS

29 OCTOBER 2019

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective purchases at all sales within Australasia.
