VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, I was asked to re-examine **the chestnut thoroughbred yearling colt** by **Admire Mars (JPN)** out of **Banksia 2023** to assess its continued suitability for public syndication. The purpose of the request was for the promoter to meet ongoing compliance with regulatory requirements by supplying a current veterinary certificate for inclusion with their PDS.

I had previously inspected this horse on behalf of my client Dynamic Syndications at the Magic Millions Yearling Sale, Bundall, Qld on the **7th January 2025**, prior to the commencement of the Sale where a detailed pre-purchase inspection was conducted including a full set of x-rays being read and were considered **low risk**, and an endoscopic evaluation conducted which was **Grade 1** (normal). I advised my client in my opinion the colt was suitable for purchase with a rating - **PASS 7**.

Identification:

Near Shoulder: **JOCKEY CAP OVER THREE CONJOINED DIAMONDS**
Off Shoulder: **18 over 3**

Clinical Examination:

This examination was conducted on **17th July 2025**. The colt has been spelling for 17 days, having recently been in training at Bimbadeen Park, Werombi, NSW. This inspection was a general health check which included temperature, pulse, respiration, thoracic auscultation, as well as an ophthalmological examination for eyesight, mucous membrane colour, musculature symmetry and conformation, where no abnormalities were found.

There was no lameness at the walk and trot in hand. No response to hoof testers was found. On palpation and manipulation of the distal limbs including major joints, no abnormalities were found. The colt has a quiet temperament. His genitalia was considered normal including two palpable descended testicles. No radiographs, blood tests, drug sampling, ECG or upper respiratory endoscope were performed. All clinical parameters were found to be within normal limits.

The colt remains a high-quality individual, athletic and free moving. He is well conformed and well balanced. The colt has grown significantly since he was purchased however is still immature and will develop further.

Conclusion:

In my opinion as at the **17th JULY 2025**, the date of re-examination, the **ADMIRE MARS (JPN) ex BANKSIA Chestnut yearling colt**, is in so far as can be determined from the examination conducted, presents in good health and has passed clinical examination and remains suitable for all risk mortality insurance cover and is suitable for racing and public syndication.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
17th July 2025

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any third party.

VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a veterinary examination of the chestnut thoroughbred yearling colt by **Admire Mars (JPN)** out of **Banksia 2023** (as described in the Magic Millions Gold Coast Yearling Sale 2025 catalogue), was performed at Magic Millions Complex, Bundall, Qld. on the 7th January 2025.

Identification:

Brands:	Near Shoulder:	JOCKEY CAP OVER THREE CONJOINED DIAMONDS
	Off Shoulder:	18 over 3

Clinical Examination:

The colt was presented in excellent clinical health, with even muscle mass and well conformed. He was a well-developed athletic colt. Upon examination all clinical parameters were found to be within normal limits. Ophthalmic examination determined no issues of concern. Auscultation of the thorax (chest) revealed a normal and regular heart rhythm at rest, with the colt having normal lungs sounds and normal respiratory rate at rest. At the time of this examination there were no issues of concern regarding his extremities. His genitalia was considered normal including two palpable descended testicles.

Repository:

The radiographic and pre scale upper airway endoscopy examinations pertaining to this horse lodged in the repository at the Magic Millions Bundall complex were examined and the findings were as follows.

Radiographs: Low Risk

Upper Airway Examination: Normal anatomy with Grade 1 function (Lane).

Conclusion:

In my opinion, at the time and within the limits of this examination the thoroughbred colt by **Admire Mars (JPN)** out of **Banksia 2023** in so far as can be determined within the scope of this examination, is suitable for syndication and all risk mortality insurance cover.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
