This PDS has been lodged with and approved by *Racing NSW*, as *Lead Regulator*. A *Form FS88 (PDS in-use notice)* in relation to this PDS has been lodged on-line with the *Australian Securities and Investments Commission* ("ASIC"). No responsibility as to the contents of this PDS is taken by either the *Lead Regulator*, ASIC, their respective officers, employees or agents. This PDS is available in both printed form and electronically in PDF format.

2. Jurisdiction

The Offer constituted by this PDS is only available to persons receiving this PDS within Australia. This PDS does not constitute an offer in any jurisdiction in which, or to any person to whom, it would be unlawful to make such an Offer. The distribution of this PDS to jurisdictions outside Australia may be restricted and persons who come into possession of this PDS should seek advice from their professional advisers and observe any possible restrictions. A failure to comply with such restrictions may violate the applicable securities law.

3. Disclosure

This PDS has been compiled by the Promoter for presentation to prospective investors in compliance with the disclosure requirements for the public offering of shares set out in *Class Order 02/139* issued by ASIC on 15th February, 2002 ("CO 02/319").

The Cooling-off period will commence at the end of the fifth (5th) day following the day upon which notification of acceptance of applications is forwarded to those applicants whose applications for Shares have been accepted ("the Cooling-off commencement date") and will expire at the end of the fourteenth (14th) day thereafter ("the Cooling-off expiration date"). An applicant who is a retail investor who desires to Cool-off must, during the Cooling-off period, notify the Promoter in writing (by post, facsimile or email) that the applicant has elected to Cool-off, in which event the applicant will be entitled to receive a full refund of all application monies paid to the Promoter.

5. Statement to prospective investors as to the commercial merits of the offer and recommendation regarding the seeking of advice

The commercial merits of investing in Shares offered in this PDS should be regarded as being of a speculative nature. The investment is not recommended for investors who are unable to risk the initial outlays and ongoing commitments.

Prior to entering into this investment, prospective investors should read this PDS in its entirety and are advised to consult their own or independent licensed financial or investment adviser, legal, taxation and other professional consultants (including bloodstock consultants) in assessing the potential merits of the investment.

13(b). Information about Management Fees for Prospective Owners

Promoters may include Management Fees in the Product Disclosure Statement.

Management of a horse by a Promoter may be considered important to some investors as certain Promoters may have extensive experience in the industry.

Investors should consider the monthly management service and fee as detailed in the Product Disclosure Statement (or other contract or agreement) for the services provided and ask any questions of the Promoter before deciding whether to proceed.

Investors should note that under usual circumstances the agreements reached to provide a management service is only for the racing career of the horse and does not extend beyond this e.g. breeding career except by separate arrangement.

14. Racing Manager

DEAN WARREN WATT will act as Racing Manager, as first appointee of the Syndicate Manager as Racing Manager, in accordance with the provisions of *clause 5* of the *Syndicate Deed*.

15. Trainer

CHRIS WALLER will train the Horse. His main stables are based at **ROSEHILL NSW** and he also has stables at **FLEMINGTON VIC**. The horse may transfer between stables should opportunities present. He is the first appointee of the Syndicate Manager as Trainer, in accordance with the provisions of *clause 6.2* of the *Syndicate Deed*.

CHRIS WALLER has agreed to train the Horse.

16. Veterinary Report

DR TIM ROBERTS of Centennial Park Veterinary Practice (ABN 91 072 794 944) BVSc, Veterinary Surgeon ("Dr Roberts") has provided an initial veterinary report as to the suitability of the Horse for purchase and syndication.

Dr ROBERTS has given, and has not, before the date of this PDS, withdrawn his consent to the issue of this *PDS* with the veterinary report being included in the form and context in which it is included.

17. Assessment of Value

The Promoter relies on the price paid for the Horse by the Offeror at public auction as being the current market value of the Horse.

18. Insurance

The Offeror has arranged mortality insurance cover with LOGAN LIVESTOCK INSURANCE AGENCY (ABN 81 001 826 204) which will expire on **1 November, 2013**, subsequent to which date each Owner will be responsible for assessing his or her own insurance risk and arranging whatever insurance cover he or she considers is appropriate.

19. Interests of the Promoter, the Offeror, the Syndicate Manager, the Racing Manager, their directors and experts

1. The Promoter, the Offeror, the Syndicate Manager and the Racing Manager, neither have, nor have had in the period of two years before the date of this *PDS*, any interest in relation to the promotion of the Syndicate or in the Horse other than the interests detailed in this *PDS*.
2. No Director or proposed Director of the Promoter, the Offeror the Syndicate Manager or the Racing Manager, either has, or has had in the period of two years before the date of this *PDS*, any interest in relation to the promotion of the Syndicate or in the Horse other than emoluments he or she may be entitled to receive from the Offeror, the Promoter, the Syndicate Manager or the Racing Manager and interests detailed in this *PDS*.
3. **Mr WALLER** neither has, nor has had in the period of two years before the date of this *PDS*, any interest in relation to the promotion of the Syndicate or in the Horse, save for the expectation that he will receive fees from training the Horse. Prospective investors should be aware that **Mr WALLER** may train other Horses syndicated and/or managed by the Promoter, Syndicate Manager and/or Racing Manager.
4. **Dr ROBERTS** neither has, nor has had in the period of two years before the date of this *PDS*, any interest in relation to the promotion of the Syndicate or in the Horse except that he will receive a professional fee in connection with the provision of the Veterinary Report. Prospective investors should be aware that **Dr ROBERTS** may provide veterinary services to other Horses syndicated and/or managed by the Promoter, Syndicate Manager and/or Racing Manager.
5. There is nothing in the *Syndicate Deed* to prevent either themselves or any members, officers, directors of the Promoter, the Offeror the Syndicate Manager or the Racing Manager, or any corporation related to any of them or their officers, from purchasing, holding, dealing in or disposing of Shares in the Syndicate, or from otherwise contracting or acting as agent or entering into or being interested in any contract or transaction whatsoever with any other of them or with any Owner.

20. Summary of rights and liabilities attaching to Shares in the Syndicate and other relevant information

The full rights and liabilities attaching to Shares in the Syndicate are set out in the *Syndicate Deed*, a copy of which is annexed to this *PDS*. Each prospective purchaser of a Share should read that document in its entirety, as each Owner of a Share will be bound by its terms. Some important points are as follows:

- (a) None of the Promoter, the Offeror, nor any person or corporation named in the *Syndicate Deed*, nor anyone on behalf of any of them, makes any representation or warranty with regard to either:
 - (i) the suitability of the Horse either for racing or subsequently for stud purposes; or
 - (ii) the reliability or adequacy of any insurance cover arranged for the benefit of the Owners and referred to in this *PDS* or the *Syndicate Deed*;

and each Purchaser of a Share must acknowledge entering into the Syndicate at his or her own risk and being aware that investment in thoroughbred horses is highly speculative.

- (b) (i) The Owner of each Share will be entitled to a pro-rata share of net Prizemoney (gross Prizemoney less the obligatory deductions of 10% for the trainer and 5% for the jockey) and Breeders Bonus or Incentive Scheme payments earned by the Horse from racing, in accordance with the provisions of *Clause 2.3* of the *Syndicate Deed*; and
- (ii) The entitlements of the Owners are subject to the default provisions set out in *clause 18* of the *Syndicate Deed*, which afford the Syndicate Manager both the right to suspend an Owner's entitlements whilst in default, and a power of sale in the event such default is not rectified within 14 days of receipt of notice.
- (c) The Owner of each share will be liable for a pro-rata share of costs associated with operating the Syndicate and with maintaining, training and racing the Horse, including any additional gratuities for wins in Group races which the Syndicate Manager may at its discretion agree to pay to the trainer and or jockey (*any such agreement to be communicated in advance and as soon as practical to the partners*) in accordance with the provisions of clauses 3 and 13.

The following are indicative of Syndicate and Horse expenses (inclusive of GST) for a full financial year, payable by each Owner monthly:

	Total for the Syndicate per annum	Per Shareholder per annum	Total per Share per month
Fee payable to Syndicate Manager by owners with 10%, 5%, 2.5% Shareholding		\$792	\$66
Estimated Horse costs (agistment, veterinary, pre-training, training and racing costs etc, but excluding major race entry and acceptance fees). *Note – these costs will vary significantly from month to month depending upon whether or not the Horse is in full training on out of training on agistment.	\$35,000	\$1,750 (5%)	\$145.83* (5%) (indicative only and subject to significant variation from month to month)
Total	\$35,000	\$2,542	\$211.83

- (d) Each Owner, by the provisions of *clause 2.8* of the *Syndicate Deed*, authorises the Syndicate Manager to do all things required to be done by an Owner to comply with the provisions of the *Syndicate Deed* and the *Rules of Racing* including signing a transfer of ownership of that Owner's interest in the event of unremedied default.
- (e) A procedure for determining the entitlements of the Owners to Trophies and replica Trophies is set out in *clause 2.3* of the *Syndicate Deed*.
- (f) A procedure for handling internal complaints is provided by the provisions of *clause 16* of the *Syndicate Deed*, which includes the right of an Owner, in certain circumstances, to have the dispute referred to the *FINANCIAL OMBUDSMAN SERVICE LIMITED (ABN 67 131 124 448)* ("FOS") for determination by conciliation or arbitration.
- (g) Provisions relating to the termination of the Syndicate on either the sale or death of the Horse, Owners agreement by Extraordinary Resolution, the Syndicate Manager electing to wind-up the Syndicate, or by order of the Court, are set out in *clause 19* of the *Syndicate Deed*.
- (h) The Owners rights of indemnity are limited by the provisions of *clauses 20 and 21* of the *Syndicate Deed*.
- (i) Investors should be aware that the Promoter, the Offeror, the Syndicate Manager and/or the Racing Manager, may each retain/acquire Shares in the Syndicate and that they may retain/acquire any number of Shares.

21. Marketing of Shares

An Owner will not be able to offer for purchase, or issue invitations to buy Shares, unless the prospective purchaser is provided with a *PDS* prepared by the Syndicate Manager in accordance with the provisions of *clause 4.8* of the *Syndicate Deed*.

In addition, there are restrictions on the sale of Shares set out in *clause 11* of the *Syndicate Deed*.

There will be no ready market for the Shares. Neither the Syndicate Manager nor the Racing Manager will be obliged to sell a Share on behalf of an Owner. Each Owner should consider the acquisition of a Share as a long term investment for the life of the Syndicate.

22. Warning

Investment in bloodstock must be considered to be of a speculative nature.

Each Purchaser of a Share must also acknowledge that there are inherent risks associated with investment in thoroughbred horses, including, without limitation, the following:

- (a) not all horses offered for syndication progress to competing in races;
- (b) the rate at which young horses mature varies markedly and it is not possible to predict with any degree of certainty at what age a horse will be mature enough to race;
- (c) not all horses which do race either win, or are placed, or earn prize money;
- (d) injuries can be sustained which may delay or inhibit a horse's ability to race, or even prevent a horse from having a racing career at all;
- (e) an extremely high percentage of colts are invariably gelded to optimise racing potential; and
- (e) insurance is available against some, but not all, risks associated with the ownership of thoroughbred horses.

23. Risk

Fluctuations in the value and sale price of Shares should be anticipated. Factors which will influence both the value and sale price of the Shares include, without limitation, the following:

- (a) the skill and expertise of the individuals engaged to manage, maintain and market the Horse, as well as the manner in which these functions are carried out;
- (b) the race performances of the Horse;
- (c) the Horse may die or its value may be diminished as a consequence of accident, injury, contraction of disease or natural cause;
- (d) the level of demand for horses of equivalent calibre both at public auction and by private treaty;
- (e) the level of supply of horses of equivalent calibre both at public auction and by private treaty;
- (f) any change in the current conditions affecting investment in the thoroughbred horse industry, including level of prize money and taxation benefits available to breeders;

- (g) changing conditions within the Australian economy generally; and
 - (h) the price which buyers at public auction or by private treaty are willing to pay either for the Horse, or Shares in the Horse, if offered for sale, may not reflect either the purchase price paid by the Offeror for the Horse or the sale price of the Shares offered under this *PDS*.
-

VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-sale veterinary examination of **Lot 532, FASTNET ROCK ex DYNAMIC LOVE Bay Yearling Filly**, brands as described in the 2013 Magic Millions Yearling Sale Catalogue, was carried out at the Sales Complex Bundall, Qld, on the 8th January 2013, prior to the commencement of the Magic Millions Yearling Sale.

Clinical Examination:

This was a Quality individual. She was athletic, with a good flowing action at the walk. She was well conformed with good scope for further physical development. She was also well balanced with good length of rein. She has a long and strong forearm and short cannon with correct angulations to shoulder and pastern. She has a strong hindquarter. She was a free moving individual who was presented in excellent condition for inspection. The filly is still immature and will develop significantly further. When fully mature, she is expected to reach an above average height of approximately 15.31 hh. All clinical parameters were found to be within normal limits. There was no response to flexion tests. Stethoscope examination of heartbeat was normal. She was examined in hand, and was found to be free moving. There was no clinical evidence of wear or injury to its extremities.

Radiographic Examination:

Pre-sale there was a full set of radiographs available for inspection in the repository at the Magic Millions Sales Complex. Upon examination, there were no radiographic findings of any significance noted.

Endoscopic Examination:

Post sale the upper respiratory tract was examined endoscopically and the larynx and pharynx were found to be normal in appearance and function.

Conclusion:

In my opinion, at the time of this examination, **Lot 532, FASTNET ROCK ex DYNAMIC LOVE Bay Yearling Filly** is in so far as can be determined from the extensive examination conducted; suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover. I confirm that I advised Dynamic Syndications that in my opinion this lot was suitable for their purchase.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS

PEDIGREE RATING SCORES - “NICKS”

It's a simple formula – It's all about risk reduction.

Nicks have become an integral part of the decision-making process in the mating and purchasing of thoroughbreds. Most breeders recognise that an affinity or compatibility can exist between two thoroughbred sire lines, such that, when crossed, those lines yielded a greater proportion of superior runners than when either one of them are crossed with any other sire lines. Great breeders, from Federico Tesio to present-day breeders around the world have relied on observed nicks to help guide their breeding plans and buying decisions.

Over 70% of ALL Stakes Winners are “A” Rated Nicks

In order to identify nicks in a systematic way, the software database we use developed an evaluation method based on sire-line analysis. Ongoing studies by researchers show that approximately 25% of the Thoroughbred population is the product of highly successful nicks ("A" rated nicks) while over 70% of stakes winners come from these "A" rated nicks!

Statistics:

There are approximately 20,000 live foals born each year –
25% (5,000) are A Rated whilst 75% (15,000) are rated below.

There are 541 Stakes Races in Australia this racing season.

70% (379) will be won from the 5,000 A rated foals born (7.6%)

30% (162) will be won from the 15,000 foals in the lower rated group (1.08%).

For a practical businessperson seeking a return on money invested, it makes no sense to ignore statistically unfavorable odds. Buying a superior racehorse is already a difficult enough proposition. The Rating systems we use allow us to see into the future by looking into the past and thereby to avoid those mating patterns that have failed. The Nick Rating enables us to avoid crosses that have had little or no success in the past. At the same time, it enables us to identify and thus duplicate successful sire-line crosses, dramatically increasing the chances of success.

Over the years evaluating Nicks have proven to be an invaluable tool in the stallion selection process when identifying yearlings for purchase. Dean Watt, Managing Director of Dynamic Syndications has enjoyed great success as a result of utilising such information. For example:

SAVABEEL, POLAR SUCCESS, HE'S NO PIE EATER, ATOMIC FORCE, ECONSUL, DE BEERS, BRADBURY'S LUCK, TENANT'S TIARA and REWARD FOR EFFORT were all superior racehorses who had superior pedigree ratings.

ECONSUL	A+ +	13,862%
SAVABEEL	A+ +	9,325%
DEBEERS	A+ +	4,270%
POLAR SUCCESS	A+ +	2,240%
REWARD FOR EFFORT	A+	1,175%
ATOMIC FORCE	A+	988%
BRADBURY'S LUCK	A	485%
TENANT'S TIARA	A	238%
HE'S NO PIE EATER	A	161%

Further afield, in 2008 the Top 5 Racehorses in the world had the following ratings:

1 CURLIN	A+	1,375%
2 NEW APPROACH	A+	1,472%
3 RAVEN'S PASS	A+ +	5,961%
4 DUKE OF MARMALADE	A	409%
5 HENRYTHE NAVIGATOR	A+ +	1,531%

Then to further support the theories, in 2008 there was 67 Group 1 races run in Australia. These races were won by 48 individual horses. When these 48 individuals' pedigrees were analysed it showed:

35 / 48 Rated A or above = 73% of Individual Group 1 Winners Rates A or above

Affinity between sire lines was long ago observed by the world's best thoroughbred breeders. Today through modern technologies we are able to quantify what was once only a subjective judgment based on the observations of a relatively small equine population.

Ratings are essentially the objective measurement of success, or lack therefore, of sire-line crosses. Success is quantified by being the winners of stakes races with a prizemoney of at least \$50,000. Through software databases, containing the pedigrees of all such winners since 1977 (over 30,000 winners), we are able to more easily identify what sire-line crosses have succeeded in producing stakes winners and compare those numbers with the stakes winning population on the whole.

Often a sire line may appear to be successful with a particular broodmare sire line. However, if the level of success is no better than that sire line's success with the entire population, then there is not a true nick.

In order to understand the ratings for easy use, a letter-grade scale was developed. As in the scholastic setting, the scales ranges from F (Fail) through to A with A+ also A++ and now since 2011 the software system now identifies A+++ as possible to be achieved in some select instances. The Variants (percentages) shown in the table below are the deviation from the norm that has been observed by that sire line cross in question. On this

scale -15% to +15% (C) is considered average, meaning that the sire-line cross has yielded results that are statistically no better and no worse than what would be expected with the entire population.

An "A" rated nick indicates that a far greater percentage of stakes winners have resulted from that cross than expected. An "F" rated nick indicates that the number of stakes winners resulting from a cross is at least 50% below expectations. This does not mean that there cannot be success or will not be success from such a mating in the future. It does mean that in all the experience of the last 20 + years of winners of stakes races, that type of mating has had a significant lack of success as measured by stakes winner production.

It must be stressed that a below "Average" rating does not guarantee or even predict failure. It means only that, to date, the particular sire-line cross has fallen at least 16% short of what would be expected. Nicks can and do change over time.

Consequently, an above Average Rating must be kept in proper perspective as there are other factors that must be considered when selecting a horse for purchase. Specifically, conformation evaluation is critical. A thoroughbred may have a brilliant pedigree on paper that rates as either Excellent, Superior, Superb or Outstanding on our Ratings Score however if the skeletal structure and/or the overall constitution of the individual is lacking then the horse is rejected as a candidate for purchase.

The Rating Scale is shown below:

Nick	Horse	Variant %
A+++	Excellent	+20,000 and above
A++	Superior	+1,501 to + 19,999
A+	Superb	+500 to +1,500
A	Outstanding	+150 to +499
B+	Very Good	+100 to +149
B	Good	+50 to +99
C+	Acceptable	+16 to +49
C	Average	-15 to +15
D+	Weak	-16 to -34
D	Poor	-35 to -49
F	Unsuccessful	-50
0 SW	Zero Stakes Winners	0 SW

Dynamic Syndications uses these rating tools along with additional pedigree analysis systems from other software databases which skewer the data to local environmental factors and we have introduced a ranking on the class of Stakes Races which are won to establish what we consider is an inherent opportunity of greater racetrack success. Often a horse can have a very high Nick rating and yet score lowly on the variant and visa versa. We use this information to assist us in pedigree selections after the physical inspections have also been considered. Also we cannot blindly accept a rating score. For example Australia has only 2.9% of our races listed as Stakes Races whilst New Zealand has 9.7% and Ireland has 13.1%. Obviously the data will be weighted in certain directions if we did not counter this information with a ranking on the Stakes Races based upon country and class of race, racing region within the country and climatic conditions in the region. After adjustments the rating scale is presented below.

Quality Rating Summary

It is undeniable that racing class is in great part a function of the *quality* of ancestors contributing to new individual. It follows that certain quality stallions tend to contribute more favorably than other sires. When Quality points contributed by such deserving sires are combined with dosage points, the total points more accurately reflect the overall class of a pedigree.

The *Quality sires* in a pedigree contribute quality points (QP) to the new individual in exactly the same way as ancestral sires contribute dosage points (DP). The total number of *Quality points* is added to the *Dosage points* to get *Total Points* (TP).

The Quality Rating, which ranges from zero, as the low, to ten, as the high, is scaled to the number of total points in the pedigree:

Total Points	Quality Rating
0	Q0
1 to 4	Q1
5 to 9	Q2
10 to 14	Q3
15 to 19	Q4
20 to 24	Q5
25 to 29	Q6
30 to 39	Q7
40 to 44	Q8
45 to 54	Q9
55 +	Q10
