VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-sale veterinary examination of **Lot476, FASTNET ROCK ex JEWEL OF THE NILE Bay Yearling Filly**, brands as described in the 2012 Inglis Australian Easter Yearling Sale Catalogue, was carried out at the Newmarket Sales Complex Randwick NSW, on the 10th April 2012, prior to the commencement of the William Inglis Australian Easter Yearling Sale.

Clinical Examination:

The filly was a strong, athletic type in excellent condition. She was well grown and has good angulations to pasterns and shoulder. She has good bone and she possesses good strength to her hindquarter. She is nicely balanced with good length of rein. She is a filly that has an easy flowing action at the walk and tracks through truly. She is very typical of most Fastnet Rock's possessing mildly offset knees and also a slight toe in conformation. This is noted for disclosure purpose only and this individual is considered within normal limits and this conformation structure is of no clinical significance. The filly is still immature and will develop further. All clinical parameters were found to be within normal limits. She was examined in hand, and was found to be free moving. Stethoscope examination of heartbeat was normal. There was no clinical evidence of wear or injury to her extremities. There was no response to flexion tests.

Radiographic Examination:

Pre-sale there was a full set of radiographs available for inspection in the repository at the Inglis Sales Complex. Upon examination, there were no radiographic findings of any significance noted.

Endoscopic Examination:

Post sale the upper respiratory tract was examined endoscopically and the larynx and pharynx were found to be normal in appearance and function.

Conclusion:

In my opinion, at the time of this examination, **Lot 476, FASTNET ROCK ex JEWEL OF THE NILE Bay Yearling Filly** is in so far as can be determined from the extensive examination conducted; suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover. I confirm that I advised Dynamic Syndications that in my opinion this lot was suitable for their purchase.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
16 April 2012
