VETERINARY EXAMINATION FOR DYNAMIC SYNDICATIONS

At the request of Dynamic Syndications, a pre-sale veterinary examination of **Lot 464, MAGIC ALBERT ex BADINOV'S BABE Chestnut yearling colt**, brands as described in the 2012 Magic Millions Yearling Sale Catalogue, was carried out at the Sales Complex Bundall, Qld, on the 10th January 2012, prior to the commencement of the Magic Millions Yearling Sale.

Clinical Examination:

This was is an extremely high quality yearling. He was very well conformed, very athletic, well grown and strong with excellent muscular development. He stands over good ground with an effortless easy flowing stride and has a well balanced action at the walk. This free moving individual has excellent rein and length of stride. He was presented in excellent condition for inspection. Both testicles were presented. The colt is still immature and will develop further. All clinical parameters were found to be within normal limits. He was examined in hand, and was found to be free moving. Stethoscope examination of heartbeat was normal. There was no clinical evidence of wear or injury to his extremities. There was no response to flexion tests.

Radiographic Examination:

Pre-sale there was a full set of radiographs available for inspection in the repository at the Magic Millions Sales Complex. Upon examination, there were no radiographic findings of any significance noted.

Endoscopic Examination:

Post sale the upper respiratory tract was examined endoscopically and the larynx and pharynx were found to be normal in appearance and function.

Conclusion:

In my opinion, at the time of this examination, **Lot 464, MAGIC ALBERT ex BADINOV'S BABE Chestnut yearling colt**, is in so far as can be determined from the extensive examination conducted; suitable for racing and public syndication and as such, is therefore suitable for all risk mortality insurance cover. I confirm that I advised Dynamic Syndications that in my opinion this lot was suitable for their purchase.

Yours faithfully,

Dr. T.M.B. Roberts BVSc. MRCVS
18 January 2012

NB: This examination is valid for seven (7) days and is only for the use of the person requesting the examination. The issuer of this certificate has no financial interest in the above horse and no contract with any other third party. The issuer has a long standing relationship with Dynamic Syndications to provide a detailed veterinary assessment and specific advice on suitability of prospective yearling purchases at all yearling sales within Australasia.

RADIOGRAPHY REPORT

Magic Albert / Badinov's Babe 2010 Colt

Lot 23 at the 2012 New Zealand Bloodstock Ready to Run Sales

I have reviewed a 34 view repository series for the above horse taken on 23/10/2012. In my opinion there are no significant findings in the above series

Dr. M.K. Brightwell BVSc (dist)

Ref: 12-905

IMPORTANT DISCLAIMER

These radiographs were taken as a survey of the most common sites for a lesion. They are not, nor are they meant to be a complete examination of the joints radiographed. They will identify approximately 90% of common lesions. To identify the remaining infrequent lesions or to provide complete coverage of all joints would require many more views. These survey views usually represent the best combination of coverage and economics. It is not a warranty of suitability, soundness or saleability. This report and the findings contained herein are solely for the addressee and may not be used or relied upon by any other person or entity. The interpretation of radiographs and findings may vary with the examiner and a horse's condition hence intending buyers should seek an independent review of the radiographic series from a veterinarian familiar with their particular requirements and expectations.
